

"The tool you need for
Baseband Quality
Assessment"

Baseband Video/TV Monitoring System

QUALTV is the new Tool for Baseband Signal Quality Assessment for TV Operators.

How can **QUALTV** help you?

- Due to the large amount of video signals and the quantity of measurements required to evaluate the Quality of Service, it is imperative to have an efficient tool, such as QualTV in your Production Center.
- **QUALTV** analyzes audio and video quality parameters in both analog and digital TV signals.
- Your baseband is delivered in optimal conditions for RF broadcasting.
- Guarantee service to your customers by preventing signal failures.
- The most convenient and user friendly tool available for your Production staff.
- Scalable architecture.

Features

- ③ Easy to use. Graphical user interface.
- ③ Remote TV baseband monitoring.
- ③ Networking support through Dial-up PSTN, ISDN, leased lines, cellular (2-2.5-3G).
- ③ Up to 163 different parameters: analog video (122); digital video (22); analog audio (11) and digital audio (8).
- ③ Analysis & Reports Generation.
- ③ Runs on MSWindows.
- ③ Supports standard video analyzers (TEK VM700) and switching matrices.
- ③ Events analysis & storage.
- ③ Multisite.
