IntegraSys' Satmotion Pocket Demo Now Available Online

Madrid, Spain/Satnews/ -- IntegraSys S.A., the worldwide provider of carrier monitoring software for the satellite market, now has an online demo for its SatmotionPocket.

The Satmotion Pocket system has been designed for Satellite Interactive Terminal (SIT) installers to provide them with a pocket tool to perform the line-up and cross polarization isolation adjustment on the uplinked carrier used for the return channel. The palm cellular phone acts as a graphics terminal to remotely control a spectrum analyzer located at the hub station from, virtually, any part of the world.

"Satmotion Pocket provides remote access to the spectrum analyzer's main functionality and prevents the need to carry extensive equipment at SIT end user location," says Juan Carlos Sanchez, executive vice-president of IntegraSys. Users will be able to make a phone call to a hub station and access the monitoring spectrum analyzer's trace information on the cellular screen in real time. Several commercial spectrum analyzer models from the main instrument manufacturers are supported by the system.

Sat Expo Still Tops

The booth of Eutelsat, SAT Expo official sponsor.

Satnews/ — SAT Expo 2002's end has confirmed the definitive launching of wireless technology -- from the smallest scale (local computer networks, wi-fi) to the largest, satellite communications are capable of covering entire continents. SAT Expo 2002 also greeted the explosion of the satellite broadband offer, such as Eutelsat's OPENSKY, for example: with a special pc board, Internet and multimedia products (audio-video, interactive games) can be received at high speeds and low costs.

This year's event, just like last year, was participated in by 20,000, participants, of which 18,300 were professional businessmen. This shows an increase of about 200 professional visitors over last year. The increase in exhibitors – 170 against 2001's 150 – and the stability in the number of visitors at a difficult time for the international economy, are greeted by President Paolo Dalla Chiara as signs of the event's good health.

The event, having reached its ninth edition, is undoubtedly the most important one in Europe in its sector, according to the organizers. It's website (www.satexpo.it) has been experiencing considerable success. It told the story of the fair in real time with news, articles and video interviews. In only one week, from 1st to 7th October, there were 13.566 single visitors, 81.183 pages
